

Your Right to Doula Support

At One Brooklyn Health, we honor your right to have a doula with you during **Labor and Delivery & Postpartum Inpatient Care**

- A doula is a trained support professional who provides continuous emotional, physical, and informational support during childbirth.
- You may choose your own doula to be present throughout your birthing experience.
- You are entitled under New York State law to have a doula with you during childbirth. This right helps ensure you receive support, comfort, and advocacy throughout your care.

Exceptions

For safety reasons, doula access may be restricted only in emergency situations where patient or staff safety could be at risk.

Make Informed Decisions About Your Care

To help patients find the care they need, One Brooklyn Health maintains a comprehensive, publicly accessible provider directory. You can search for healthcare providers by specialty, name, or location across our network of hospitals and clinics. Access the directory at onebrooklynhealth.org

Questions?

Please speak with your **Nurse, Physician, or Patient Relations team** for more information.
