

Pediatric Allergy & Immunology

We are committed to offer care plans that meet each child's needs, and to provide the highest quality treatment for our patients. We also use the up to date techniques to identify and treat a wide variety of food allergies and allergies to medications.

Complete diagnostic and treatment services for infants, children and adolescents with allergic diseases including:

Skin allergy diagnostic testing

Blood allergy diagnostic testing

Laboratory assessment of allergic disorders

Our partnership with the Pediatric Pulmonology allows us to provide extraordinary care to children with various forms of allergic diseases.
